### Cataract

- **Age related cataract**
  - Incipient
    - Cortical
    - Anterior subcapsular polar
    - Posterior subcapsular polar
  - Nuclear
  - Morgagnian
  - Other age related

- **Infantile and juvenile cataract**
  - Unspecified
  - Cortical, lamellar, or zonular
  - Nuclear
  - Anterior subcapsular polar
  - Posterior subcapsular polar
  - Combined forms

- **Specify right, left, or bilateral eye(s)**

- **Identify circumstances surrounding traumatic cataract**

- **Specify any associated or underlying conditions** (e.g., chronic iridocyclitis, glaucoma)

- **Traumatic cataract**
  - Unspecified
  - Localized
  - Partially resolved
  - Total

- **Complicated cataract**
  - Unspecified
  - With neovascularization
  - Secondary to ocular disorders
  - Glaucomatous flecks

- **Drug-induced cataract** (List associated drug)
  - Secondary cataract
  - Soemmering’s ring
  - Other
